[UAA-1974-169-2050-001]

Of the whole world's Resources Canada possesses 16.719%; Alberta 14.8[illegible]%. Of Canada's Resources Alberta 87.1%, and B.C. 6.147%. Alberta and B.C. combined have in classes A. B. & C., 269.699 metric tons, or converting that into 2000 lb. tons = 297.289. 97,612,002,000 tons are embraced in the above schedule which is 32.83% of the 297,289,000,000, in round numbers one-third.) (The world's Resources so far as Canada is concerned was worked out by the said Geological Branch.)

Alberta in said classes contains 219,203 million tons of 2000 lbs. each, and B.C. 78.086. Combined 297,289 million tons. According to said schedule in said classes in Alberta within area covered by graph 51 there are 44,029,642,000, or 20.08% of the total for said Province in those classes. In B.C. within the area covered by said graph 53,582,540,000 or 68.62% of the total for said Province in those classes.

Total Resources of Alberta in those classes = 219,203,000,000 tons. Of that portion of B.C. embraced in said graph 51, 53,582,540,000. The two combined = 272,785,540,000. The amount of said classes embraced in said graph = 97,612,002,000, which is 35.8% of the preceeding number; or in other words the territory embraced in said graph contains 38.82% of the whole of Alberta and that portion of B.C. included in said graph.

Taking that portion of said graph embraced within the following boundaries:

On the South by the Southerly limit of Twp. 5, and the same produced Westerly to its intersection with the Elk River in B.C.

On the East by a line commencing at the S.E. angle of Twp. 5 - 1 - W5th; thence North 2 miles; thence West 4 miles; thence North 4 miles to the N.E. angle of Sec. 32-5-1; thence North Westerly to the N.E. angle of Sec. 12-7-3; thence North to the N.E. angle of Twp. 13 - 3; thence West to the S.E. angle of Sec.5-14-4; thence North to the N.E. angle of Sec. 8-20-4; thence West to the S.E. angle of Sec. 13-20-5; thence North to its intersection with the Bow River on the East side of Sec. 13-26-5.

On the North commencing at the intersection with the Bow River with the Easterly limit of Sec. 13-26-5; thence Westerly ascending the Bow River to the Easterly limit of the Stony Indian Reserve; thence following the Easterly, then Southerly; then Westerly limits of said Reserve to the Bow River; thence Westerly ascending the Bow River to its intersection with the Easterly limit of Sec. 12-25-11; thence N.W. to the N.E. angle of Sec. 30-26-11; thence West 2 miles to the N.W. angle of Sec. 25-26-12.

On the West commencing at the N.E. angle of Sec. 25-26-12; thence Southerly 3 miles; thence Easterly to the S.W. angle of Sec. 4-23-9; thence continuing South Easterly to the Summit of the Mountains where it is intersected by the Westerly limit of the grant of land made by the B.C. Government to the Northern Coal Company thence Southerly, Easterly, Southerly and so on following the said limit of said grant to its intersection with the Elk River; thence following said Elk River Southerly and with the stream to its intersection with the first mentioned or Southerly limit of the parcel containing approximately 3377 sq. miles or 2,161,000 acres.

The foregoing area contains 3377 sq. miles which equals 2,161,000 acres.

According to the foregoing estimates, 97,612,002,000 tons of Anthracite and Bituminous coals lie in said area which = 45,169 tons per acre or 1.037 tons per square foot. Or 24.7 feet in thickness of coal over the entire field; taking 1 cubic foot of coal in situ as 84 lbs.

During 1917, the last year statistics are available, the consumption of coal in Canada was 33,171,000 tons. The amount embraced within said graph will therefore provide a yearly output of that amount for 2,943 years.

Probably the assertion that there are few, if any, parts of the world that for the same area contain an equal amount of coal, is correct.

It will be observed that all these calculations are confined to high grades of coal, lignites, or as classified by the Mining Branch of Alberta, Foosatic coals, not included.

Calgary, Alta., 17th March, 1921.

Wm. Pearce.
